CampusNotes - Academic Study Resource

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING - SEMESTER 5

OFFICIAL ACADEMIC STUDY MATERIAL - CSE CURRICULUM

Experiment 10: Database Backup, Point-in-Time Recovery & Dump Ops

Course: Advanced Database Engineering Laboratory [23CS3506]
Category: Experiments / Practicals | Experiment #10 | Academic Year: 2026-27

---

1. Overview & Objective:

Execute physical and logical database dumps pg_dump and restore databases to specified point in time.

2. Practical Tasks & Verification Steps:

1. Execute pg_dump utility backing up university database to compressed custom format file university.dump.
2. Simulate catastrophic data loss dropping a critical table DROP TABLE enrollment .
3. Execute pg_restore restoring database from backup file and verify table integrity.
4. Demonstrate continuous WAL archiving and Point-in-Time Recovery PITR configuration in postgresql.conf.

Submission Guidelines & Verification:

This document verifies end-to-end PDF storage, preview, and download for CampusNotes.
Administrators can safely edit metadata, publish/unpublish, or replace this document.
